SUMMARY

Computer Science undergraduate at NIT Sikkim with hands-on experience in Machine Learning, Deep Learning, Natural Language Processing, and Computer Vision. Proven ability in building and deploying AI solutions, including transformer-based text summarization systems and transfer learning models. Skilled in Python, TensorFlow, PyTorch, and software engineering fundamentals.

EDUCATION

National Institute Of Technology, Sikkim

B.Tech - Computer Science and Engineering – **CGPA: 7.87**

Expected 2027

Ravangla, Sikkim

WORK EXPERIENCE

AI/ML Engineering Intern

Ahskeed Technologies

May 2026 – Present

Remote

- Built a recommendation engine using Apriori and FP-Growth algorithms to identify product associations and cross-sell opportunities.
- Developed personalized recommendation and offer-generation pipelines using customer behavioral data.
- Implemented a Next-Best-Action framework to recommend customer engagement strategies and business actions.

Software Developer Intern

Finixia Dedecons Pvt. Ltd.

Jun 2025 – Oct 2025

Remote

- Developed and deployed 2+ production-grade full-stack applications using MERN and PHP/MySQL with REST API integration.
- Managed deployment, domain configuration, SSL setup, and production server environments.

PROJECTS

Abstractive Text Summarization using PEGASUS | Python, PEGASUS, Transformers

- Fine-tuned Google's PEGASUS transformer model on the SAMSum dataset for abstractive dialogue summarization.
- Implemented preprocessing pipelines including tokenization, truncation, padding, and input-label mapping.
- Achieved a ROUGE-1 score of 45.95% while generating coherent and context-aware summaries.

Cattle Breed Recognition using Deep Learning | Python, TensorFlow, MobileNetV2, OpenCV

- Developed a computer vision system for cattle breed classification using MobileNetV2 transfer learning architecture.
- Applied image preprocessing and augmentation techniques to improve model generalization on limited datasets.
- Achieved approximately 80% classification accuracy and deployed the model using Streamlit for real-time predictions.

Recommendation Engine and Next-Best-Action System | Python, Pandas, Apriori

- Built a recommendation engine using Association Rule Mining techniques to identify product relationships.
- Implemented personalized recommendation and offer-generation pipelines based on customer behavioral data.
- Designed a Next-Best-Action framework to recommend customer engagement and business strategies.

SKILLS AND COMPETENCIES

Programming Languages: Python, C++, SQL

Machine Learning & DL: Scikit-learn, TensorFlow, Keras, PyTorch, CNNs, Transfer Learning

Data Science & NLP: Pandas, NumPy, Matplotlib, Seaborn, Transformers, PEGASUS, Hugging Face, OpenCV

Databases & Tools: MySQL, MongoDB, Git, GitHub, Jupyter Notebook, VS Code, Streamlit

POSITION OF RESPONSIBILITY

Web Development Cell – NIT Sikkim

Technical Member

Nov 2024 – Present

Ravangla, Sikkim

ACHIEVEMENTS

- Solved **300+** Data Structures and Algorithms problems on **LeetCode** with a contest rating of 1695.
- Completed the **AWS Cloud Practitioner Essentials** certification by **Amazon Web Services (AWS)** .
